Stages of Growth

Stages of Growth

PUTTING IT ALL TOGETHER...

Vision

A globally recognized leader in corporate shared services

Mission

To transform and deliver corporate shared services for the Singapore Public Service

Strategic Pillars

PEOPLE
Resize, reskill and reshape VITAL's workforce to *empower employees* to create value for stakeholders.

PLATFORM
Strengthen *systems* and *structures* to make VITAL an effective *ops-tech corporate services innovation* platform.

PARTNERS
Expand and cultivate VITAL's *ecosystem of partners* to *catalyse* and *facilitate* corporate services transformation across WoG.

Values

 **Visionary** **Innovation** **Teamwork** **Agility** **Leadership**

Public Service Values

 **Integrity** **Service** **Excellence**

Tech in our 3 Strategic Pillars

RECAP: THE FUTURE

CLOUD FIRST

Aligned with Whole-of-Govt direction to draw on Cloud capabilities & solutions as part of wider transformation.

EXPLORATION

Exploiting emerging digital, data and automation technology to reinvent VITAL's service delivery & business model.

LEVERAGING CENTRAL PLATFORMS

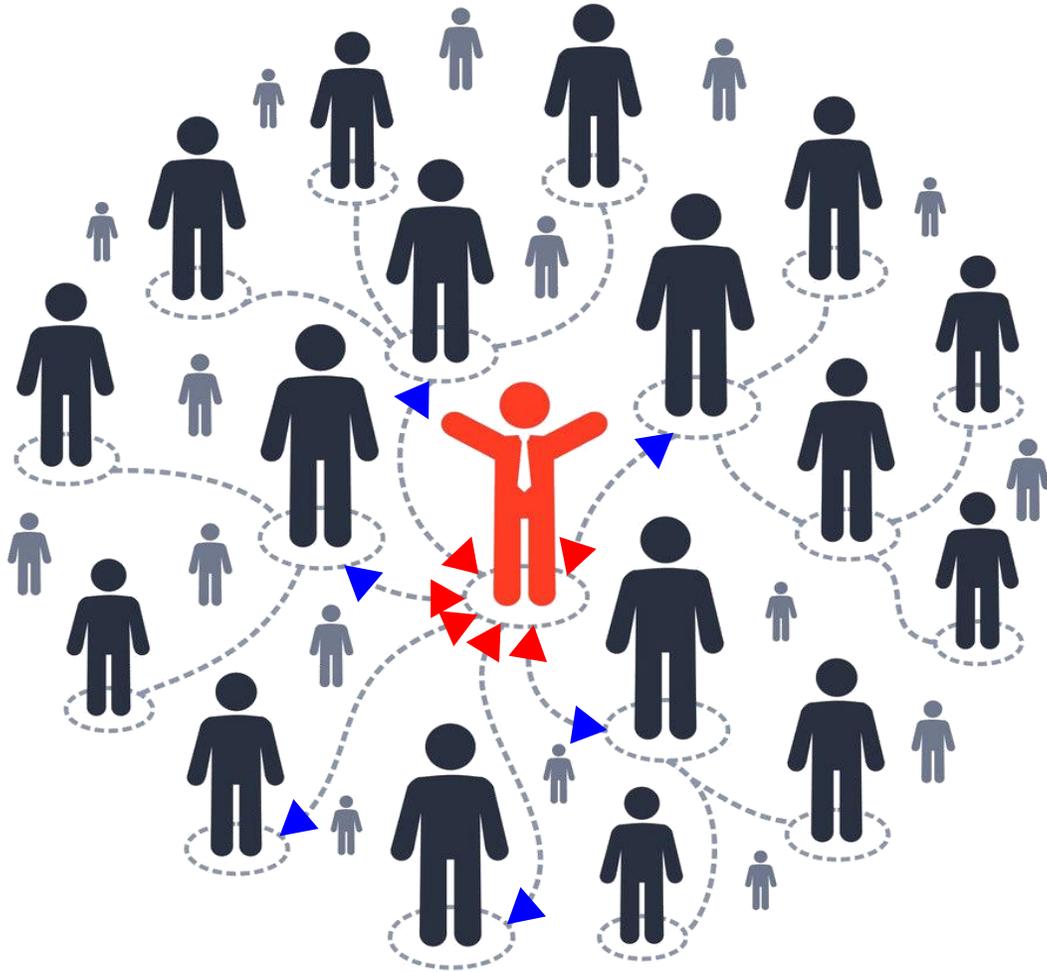

Leveraging GovTech's Standard Products Suite, Data Science & Central AI products, SG Tech Stack and bulk tenders to expedite delivery.

LEARNING FROM THOUGHT LEADERS

Actively seeking to learn and implement best practices from leading organisations in the private and public sector to VITAL.

Enhancing VITAL's RPA Setup To Cloud Native Platform

2017-2018

Localised RPA Setup

Individual Product Installation

No Orchestrator
(i.e. RPA control centre)

Studio & Attended Robot

Officers' Laptop/Desktop

2019-2021

Enterprise RPA Setup

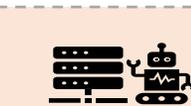

Individual Product Installation

Orchestrator

Virtual Machine

Connected and monitored by the Orchestrator in the Server room

Unattended Bots

Studio / Attended Robot

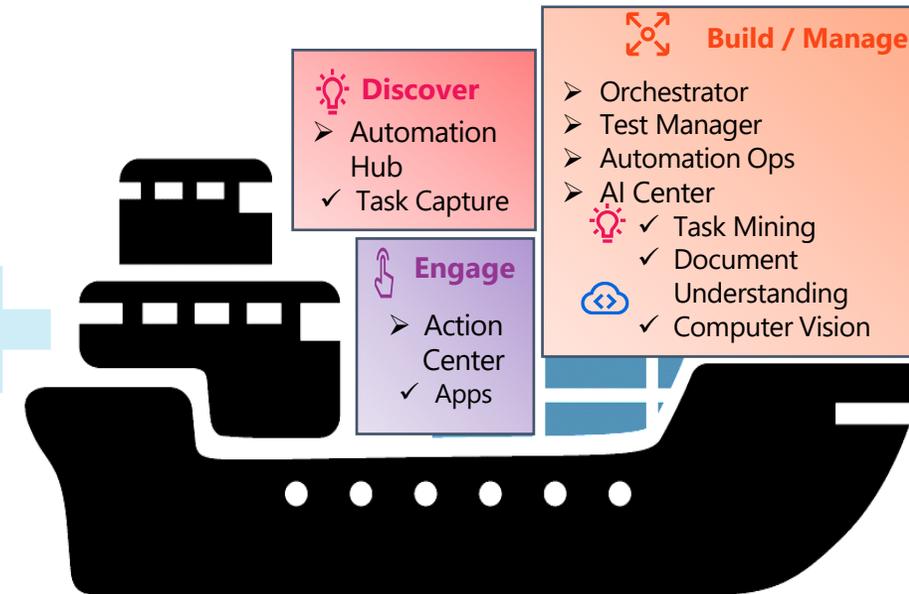

Officers' Laptop

2022 & beyond

Centralised RPA Cloud Native Setup

Automation Suite

Benefits

- Centralised Delivery of Corporate Shared Services
- Enable Compatibility and Compliance
- Enable Agility and Tech Exploration
- Reap Economies of Scale and Lower Barriers
- Facilitate Monitoring

Central Infrastructure

- “automation-fueled transformation is a game changer for this era”
- Learn from the best practices in private sector
- Open to work with all suitable vendors/technologies

Robert Enslin (He/Him) · 1st

Co-CEO UiPath

9h · 🌐

Like ERP in the '90s, the internet in the 2000s, and the cloud in the teens, [#automation](#)-fueled transformation is a game changer for this era.

At our [#UiPathFORWARD 5](#) event, customers like [Dennis Lui](#), Chief Executive of [VITAL \(Ministry of Finance\)](#), [James Furlong](#), VP of Supply Chain Management & Projects at [PUMA Group](#), and [Sidney Madison Prescott, MBA](#), Global Head of Intelligent Automation at [Spotify](#) spoke about the transformational outcomes their organizations have achieved with [UiPath](#).

For example, at VITAL, Singapore Public Service's central agency for corporate shared services, automation has been the core of the organization's digital roadmap since 2017. Today, they employ over 100,000 people across 100 agencies and plan to give each employee “instant access to standardized, ready-to-deploy robots and solutions.” Their growing number of citizen developers have been hard at work creating automations within the agency and have improved productivity by 66%.

This is just one example of how automation is shifting from a tool to a way of operating and a way of innovating – making work more enjoyable for everyone. More on my observations from my first UiPath FORWARD.

AI-Enabled Recruitment Pilot

Putting it all together

AI Recruitment Tech Pilot – A Case In Point

Background

Current Recruitment Landscape

Pressure to recruit faster and better quality candidates

- War for talent has never been fiercer
- Fastest offer wins

Hire and forget

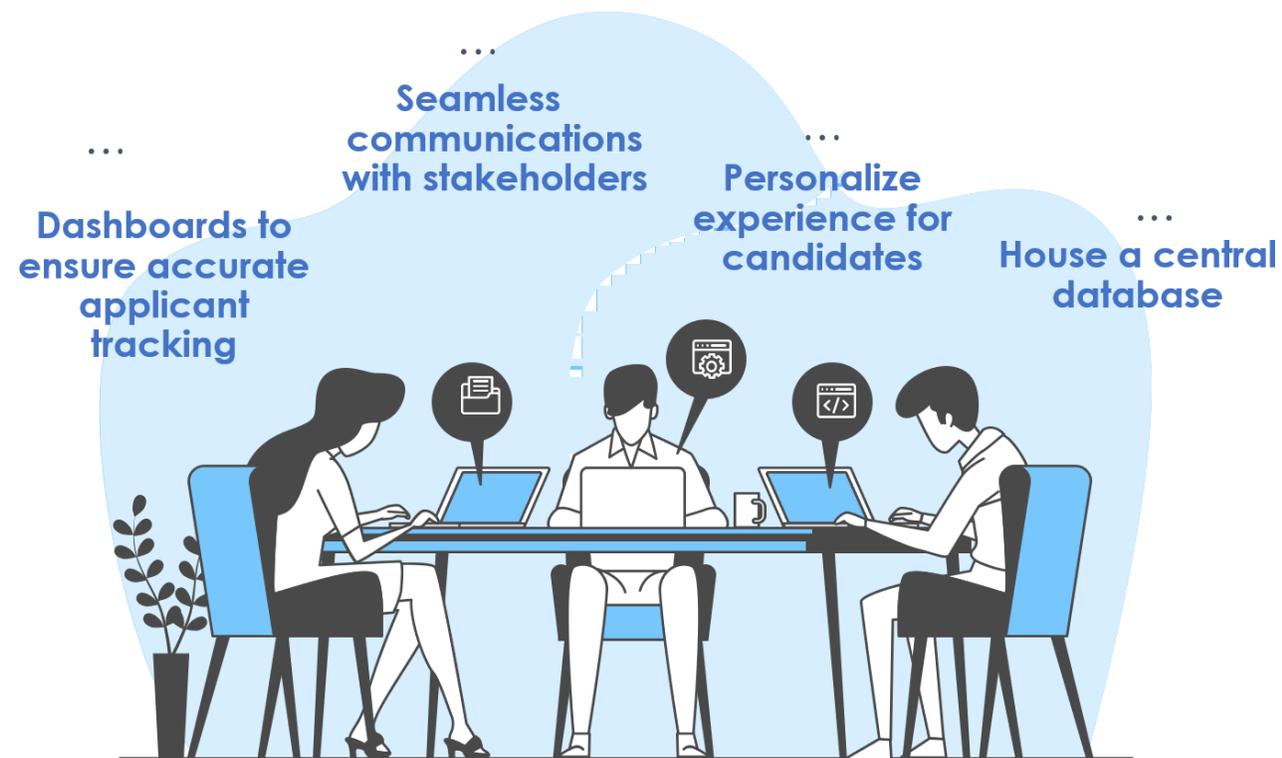

- No centrally managed database of past/unsuccessful applications (which is an untapped pool of candidates for WOG agencies)
- Only look at candidates who have applied to a job

Happening in silos and lack technology adoption

- Lack of common database to facilitate information exchange across agencies
- Underutilisation of technology to facilitate the recruitment process and derive at the best match efficiently

What recruiters want in an AI-powered system

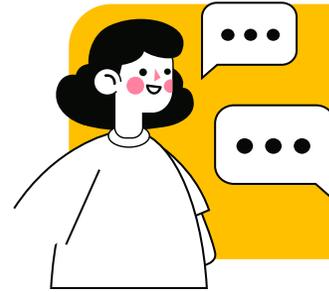

The Recruiter's Journey

1. Job Posting

Posting on Careers@gov – HRP and Cumulus recruitment portal

4. Interviews

Candidate undergoes various rounds of interview with different stakeholders

2. Shortlisting

Finding the right candidate by manually combing through applications and resumes

5. Screening

Conducting security, background and referral checks

3. Surface Resume

Shortlisted resumes are often passed to line managers for further evaluation

6. Offer

Offer and negotiation of contract

The Recruiter's Painpoints

2. Shortlisting

Finding the right candidate by manually combing through applications and resumes

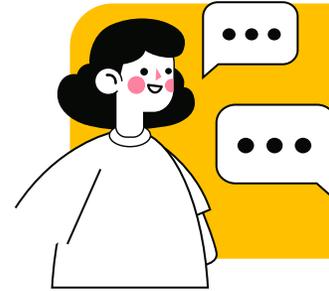

3. Surface Resume

Shortlisted resumes are often passed to line managers for further evaluation

- Shortlisting ranges from hours to days to complete due to sheer number of applicants
- Tedious to track and update candidate's status on separate tools (e.g. another ATS / sharepoint / excel)

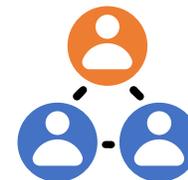

4. Interviews

Candidate undergoes various rounds of interview with different stakeholders

5. Screening

Conducting security, background and referral checks

- Coordination with candidates and stakeholders for interview
- Lengthy and manual checks and clearance process

The Jobseeker's Journey

01

Create Account

On HRP – Careers@ Gov
On Cumulus –
Workday Recruitment

02

Job Search

Apply search filters
Read JD and submit application

03

Wait

Continuously check for updates in HRP/Cumulus

05

Offer/Reject

Accept/reject on HRP/Cumulus and signing of letter of appointment if accept

04

Interview

Prepare for assessment and Interviews

The Jobseeker's Painpoints

01

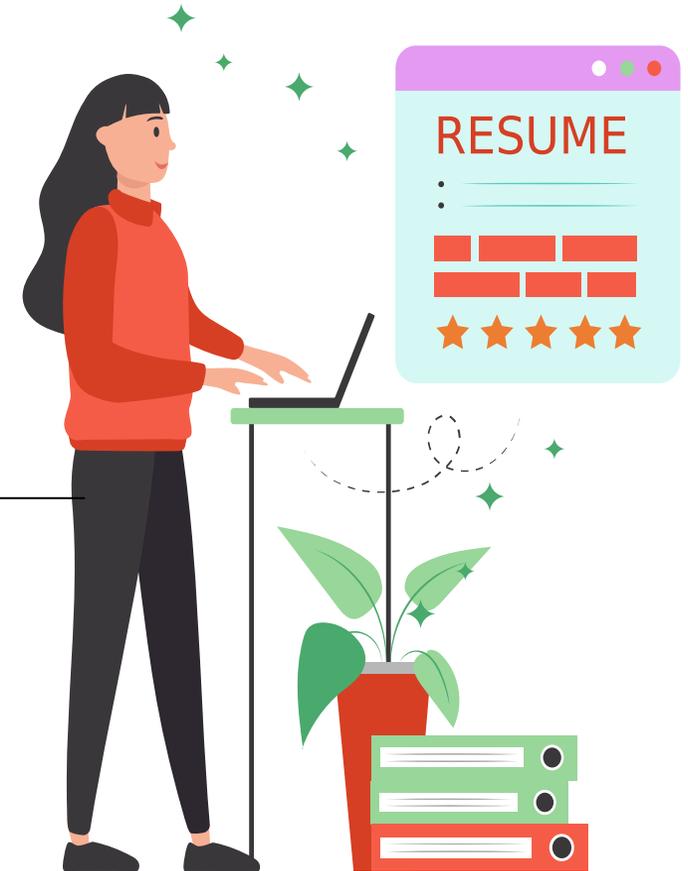

Lack of Clarity

1. Unclear application status and timelines
2. Unclear reasons why they have been rejected

02

Uncertainty

1. Unsure if they are a good match
2. Unsure if they are considered for other suitable positions

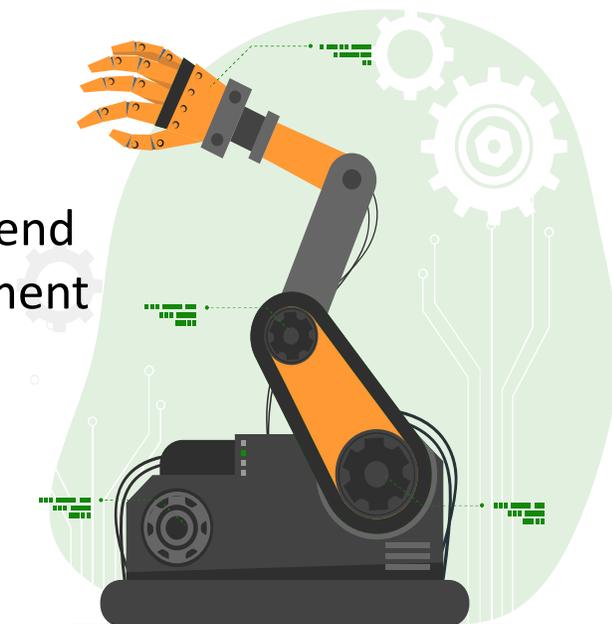

VITAL Rising To The Occasion

- Agencies face similar challenges – the need to do more with less resources
- Demands of various departments and initiatives need to be prioritised
- Naturally adverse to transiting to shared services
 - Downsizing of agencies workforce
 - Reduction in agencies budget

- VITAL faces similar challenges, however we saw technology as a means to that end
- VITAL's culture of innovation and experimentation helps foster an environment where we are open to trying and failing
- Embarked on several pilots with an objective to streamline work processes
- Conducted pilots for **AI (XOPA)**

VITAL's Artificial Intelligence (AI) Recruitment Pilot

- VITAL embarked on a pilot in Dec 21
- Till date, we have 12 agencies onboard
- Objective is to create a seamless recruitment shortlisting and selection process using AI

XOPA's Solution

Jobs

- Push jobs to job portals and LinkedIn
- Import resumes from job portals & LinkedIn
- Manage applications in one place
- Create and nurture talent pool for future vacancies

Applications

- Screen, score, rank with AI based on CV relevance, loyalty & performance
- Recommend candidates from talent pool
- Candidate's dashboard is updated to show if they are being shortlisted for other positions

Assessments

- XOPAROOM is used for assessments and video interviews
- Can be administered to all candidates with one click
- Cognitive and textual analytics with AI
- Inclusive hiring with masking of personal details

AI-Driven Recruitment

1. AI Driven Metrics

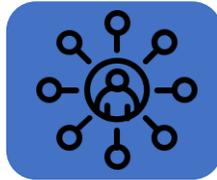

To complement holistic decision making

Extract of a research officer role

1

2

3

2. AI Retargeting

AI also recommends from talent pool

3. Automation of Assessments

Complementary scoring from video interviews

AI-Driven Recruitment

XOPA AI with ChatGPT Integration - Power up Hiring

XOPA^{AI}

NOW WITH

Gen-AI Capabilities

- Write job descriptions
- Create prescreening questions for candidates
- *Ask Me Anything* - Candidate sourcing bot
- Provide salary recommendations

Overall integration of ChatGPT: <https://vimeo.com/822630426>

Demo of the ChatGPT on XOPA <https://vimeo.com/x0paai/x0paandchatgpt>

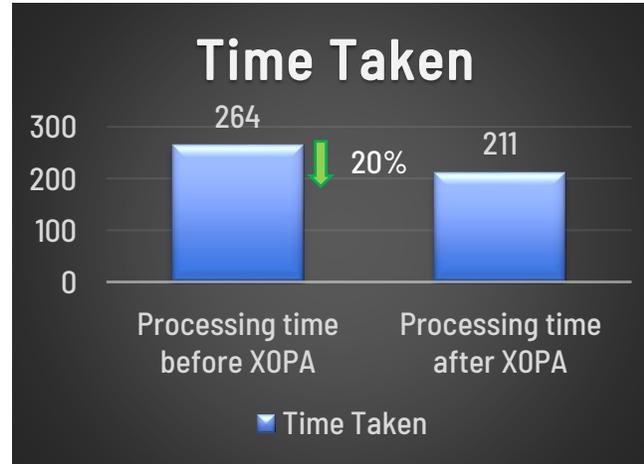

Prash Sundaraman
Country Manager Singapore
Prash@x0pa.com

Benefits

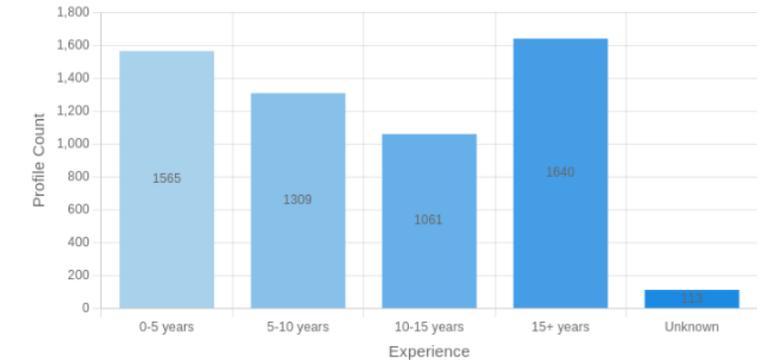

Reduction in processing time for shortlisting

- AI scores are immediately reflected on a dashboard
- Recruiters can see how many candidates are in the pipeline
- Seamless dashboard reporting
- Shorter waiting time for jobseekers

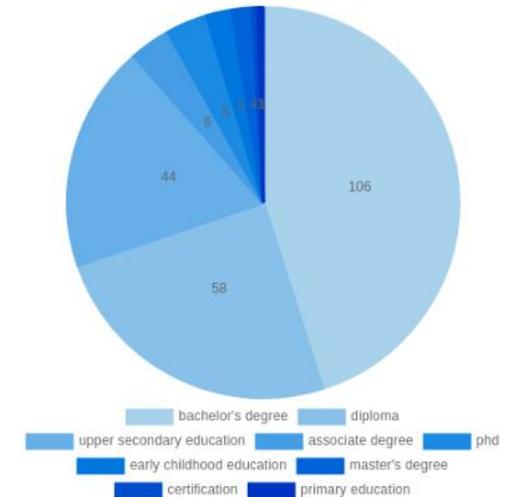

Candidate distribution by Experience Range

Here you can see the candidates distribution by work experience

Job Distribution by Qualification

Here you can see the jobs distribution by qualification

Performing recruitment on the fly

- AI recruitment system is real-time and scores candidates as they apply
- System is available 24 hrs 7 days a week and easily accessible on multiple devices – need not be limited to only performing on office laptops

Screenshots of XOPA's dashboard of hiring demographics

Benefits

Enhancing the recruitment experience

- Customized messages and notifications for candidates at different stages along the recruitment process
- Enhancing the image of public service – to be seen as the choice employer

Email Templates

XOPA is AI Verify certified

- XOPA has been certified by IMDA on 3 components
 - Business viability and sustainability
 - AI ethic principles
 - Innovation and growth of product
- Through IMDA's rigorous assessment in the form of submitting P&L statements, conducting reference checks on clients and assessing strategic outcomes, XOPA managed to attain AI Verify status

AI Governance Testing Framework & Toolkit

- Launched by Singapore’s IMDA and PDPC* to promote transparency on the use of AI.
- Verifies the performance of an AI system against the developer's claims and with respect to internationally accepted AI ethics principles (e.g. from EU and OECD).
- Independent third-party verification to help companies assess AI solutions' performance and trustworthiness.
- Standardized assessment framework that covers the technical robustness, fairness, ethics, and explainability of AI solutions.
- Companies that participate in the program can use the AI Verify mark to demonstrate implementation of responsible AI in an objective and verifiable manner.
- XOPA is the first and the only HRtech company to have achieved the AI Verify status for ethical, responsible and explainable AI.

*IMDA: Infocomm Media Development Authority

PDPC: Personal Data Protection Commission

AI Verify Framework (AI Verify Framework.pdf)

- AI Governance Testing Framework and Toolkit is currently available as a Minimum Viable Product (MVP) for system developers and owners who want to be more transparent about the performance of their AI systems through a combination of technical tests and process checks.

TRANSPARENCY ON USE OF AI AND AI SYSTEMS So that individual are aware and make informed decisions			
1. TRANSPARENCY Appropriate info is provided to individuals impacted by AI system			
UNDERSTANDING HOW AI MODEL REACHES DECISION Ensuring AI operation/results are explainable, accurate and consistent	SAFETY & RESILIENCE OF AI SYSTEMS Ensuring AI system is reliable and will not cause harm	FAIRNESS / NO UNINTENDED DISCRIMINATION Ensuring that use of AI does not unintentionally discriminate	MANAGEMENT AND OVERSIGHT OF AI Ensuring human accountability and control
2. EXPLAINABILITY Understand and interpret what the AI system is doing 3. REPEATABILITY / REPRODUCIBILITY AI results consistent: Be able to replicate an AI system's results by owner / 3 rd -party	4. SAFETY AI system safe: Conduct impact / risk assessment; Known risks have been identified/mitigated SECURITY Cybersecurity of AI systems 5. ROBUSTNESS AI system can still function despite unexpected inputs	6. FAIRNESS No unintended bias: AI system makes same decision even if an attribute is changed; Data used to train model is representative DATA GOVERNANCE Source and quality of data: Good data governance practices when training AI models	7. ACCOUNTABILITY Proper management oversight of AI system development 8. HUMAN AGENCY AND OVERSIGHT AI system designed in a way that will not decrease human ability to make decisions INCLUSIVE GROWTH, SOCIETAL & ENVIRONMENTAL WELL-BEING Beneficial outcomes for people and planet

Figure 1 Initial set of AI ethics principles for MVP

Cost Control Strategy – Win-Win Partnership

How VITAL Benefits

- Platform to
- a) experiment and apply emerging AI technology to corporate functions which could potentially be scaled up across agencies
 - b) incorporate recommended features for “free”!
 - c) enjoy competitive pricing by start-up

How XOPA Benefits

- Platform to
- a) solicit feedback on product functionalities
 - b) iron out issues
 - c) identify opportunities for improvements to develop more appealing product
 - d) raise profile of company
 - e) grow profits

Future Plans for AI-Enabled Recruitment Pilot

- To integrate with existing HR Systems
- To create a standard offer package for interested agencies to subscribe
- VITAL to value add by adopting XOPA to drive shortlisting and selection for our service partners
- Drive greater adoption of AI and Machine Learning (ML) in the Public Service

The logo for VITAL features the word "VITAL" in a red, serif font. The letter "A" is replaced by three stylized human figures: a red figure at the top and two blue figures below it, all with their arms raised. The background of the entire image is a landscape with a winding road under a sunset sky with rays of light.
